# Results from Assignment 5

---

Allison Wang

Chris Novak

# Final project proposals

---

Short description of what you want to work on, how you will accomplish it, resources you will rely on, etc.

## Submitted to Canvas

- Will add it this weekend, due next Thursday

## Ideas:

- implement one or two papers we discuss
- extend a previous assignment with new functionality
- grads: ideally combine topics from the class with your own research interests

# Project idea: Image-based lighting

images from: [https://courses.engr.illinois.edu/cs498dh3/fa2014/projects/ibl/ComputationalPhotography\\_ProjectIBL.html](https://courses.engr.illinois.edu/cs498dh3/fa2014/projects/ibl/ComputationalPhotography_ProjectIBL.html)

# Project idea: Gradient-domain editing

image from: [http://graphics.cs.cmu.edu/courses/15-463/2012\\_fall/hw/proj3g-gradient/](http://graphics.cs.cmu.edu/courses/15-463/2012_fall/hw/proj3g-gradient/)

# Project idea: Flash/no-flash

Denoising with detail transfer

# Paper presentations

---

Upload your presentation material to Canvas

- latest by the end of the day of your presentation

# Paper discussions

---

Let's try to make it a bit more informal

- After presentation, we'll all sit down
- Point is to all figure out details of the paper *together*

# Paper discussions

---

A good way to start:

- ask questions about what you didn't understand!
- asking a "dumb" question is better than being silent
- discussant starts and should fill in silences with their own questions or comments
- try to let things evolve organically
